# Best Proven Nonpharmacologic Interventions for Prevention and Treatment of Hypertension* 

|  | Nonpharmacologic Intervention | Dose | Approximate Impact on SBP |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  | Hypertension | Normotension |
| Weight loss | Weight/body fat | Ideal body weight is best goal but at least 1 kg reduction in body weight for most adults who are overweight. Expect about 1 mm Hg for every 1 kg reduction in body weight. | $-5 \mathrm{~mm} \mathrm{Hg}$ | $-2 / 3 \mathrm{~mm} \mathrm{Hg}$ |
| Healthy diet | DASH dietary pattern | Diet rich in fruits, vegetables, whole grains, and low-fat dairy products with reduced content of saturated and trans I fat | -11 mm Hg | $-3 \mathrm{~mm} \mathrm{Hg}$ |
| Reduced intake of dietary sodium | Dietary sodium | $<1,500 \mathrm{mg} / \mathrm{d}$ is optimal goal but at least $1,000 \mathrm{mg} / \mathrm{d}$ reduction in most adults | $-5 / 6 \mathrm{~mm} \mathrm{Hg}$ | $-2 / 3 \mathrm{~mm} \mathrm{Hg}$ |
| Enhanced intake of dietary potassium | Dietary potassium | $3,500-5,000 \mathrm{mg} / \mathrm{d}$, preferably by consumption of a diet rich in potassium | $-4 / 5 \mathrm{~mm} \mathrm{Hg}$ | -2 mm Hg |
| Physical activity | Aerobic | - 90-150 min/wk <br> - $65 \%-75 \%$ heart rate reserve | $-5 / 8 \mathrm{~mm} \mathrm{Hg}$ | $-2 / 4 \mathrm{~mm} \mathrm{Hg}$ |
|  | Dynamic Resistance | - 90-150 min/wk <br> - $50 \%-80 \% 1$ rep maximum <br> - 6 exercises, 3 sets/exercise, 10 repetitions/set | -4 mm Hg | -2 mm Hg |
|  | Isometric Resistance | - $4 \times 2 \mathrm{~min}$ (hand grip), 1 min rest between exercises, 30\%-40\% maximum voluntary contraction, 3 sessions/wk <br> - 8-10 wk | $-5 \mathrm{~mm} \mathrm{Hg}$ | -4 mm Hg |
| Moderation in alcohol intake | Alcohol consumption | In individuals who drink alcohol, reduce alcohol $\dagger$ to: <br> - Men: $\leq 2$ drinks daily <br> - Women: $\leq 1$ drink daily | -4 mm Hg | $-3 \mathrm{~mm} \mathrm{Hg}$ |

[^0]
[^0]:    *Type, dose, and expected impact on BP in adults with a normal BP and with hypertension.
    $\dagger$ In the United States, one "standard" drink contains roughly 14 grams of pure alcohol, which is typically found in 12 ounces of regular beer (usually about $5 \%$ alcohol), 5 ounces of wine (usually about $12 \%$ alcohol) and 1.5 ounces of distilled spirits (usually about 40\% alcohol).
    Table 15
