

Clinical Champion Update

Date: 12/20/19

Subject: RAF (Risk Adjustment Factor)

Remember to RAF!!

- Check Athena's red numbers at assessment, or in the problem list. Address and document or delete if appropriate...
- Remember you must address in HPI and assess in plan...
- Think about Morbid Obesity including new BMI 35 with co morbidities such as osteoarthritis, HTN, chol, stroke, TIA, glucose intolerance, diabetes, and gout
- Think about COPD
- Think about CHF
- Think about alcohol or opioid abuse
- Think about depression

And Happy RAF-ing to all at this holiday season!

Shersten Killip MD, MPH
