

September 12, 2023

Important message regarding COVID-19 vaccines from the Massachusetts Vaccine Program:

- Bivalent Moderna and Pfizer-BioNTech COVID-19 vaccines are no longer authorized for use in the United States.
- Administration of bivalent Moderna COVID-19 vaccines has been discontinued at VMG in accordance with instructions from the Massachusetts Vaccine Program.

The FDA approved an updated formula COVID-19 vaccine Monday September 11th and the CDC meets today to consider recommendations.

VMG will not be providing the updated formula COVID-19 vaccine for adults; patients should be referred to their local pharmacy.

VMG anticipates providing the updated formula COVID-19 vaccine for patients under 19 years of age when it is made available thru the state vaccine program.

Any questions please let me know.
