------------------	--	---	---

Terms:

Sensor - the device that is applied to the body; a small metal filament under the skin senses the glucose levels; **Libre sensors last 14 days, Dexcom sensors last 10 days**

Transmitter - (Dexcom G6 only) - connects to the sensor; sends (or transmits) the glucose information from the sensor to the receiver; **lasts 90 days**

Receiver - device that receives the glucose readings from the sensor

How to order (3 month supply with 3 refills):
