## *Clinical Champion Update*

---

*Date: 7/13/23*

*Subject: ASTHMA*

**The attached table describes stepwise Asthma management including symptoms and indicated pharmacologic interventions as described by Uptodate. The information included is for outpatient asthma management outside of an acute exacerbation. Prescribers may consider step down therapy after 3 months of well controlled asthma. Asthma encounter plans have been updated to reflect the designations included in the tables.**

**Thank you**

Emily Graef
